SUMMARY

Analytical M.Sc. (Integrated) Computational Statistics student at VIT with a strong foundation in statistical modeling and data-driven decision-making. Expert in executing end-to-end data analysis workflows, including data cleaning, exploratory data analysis (EDA), and predictive modeling. Skilled in Python, SQL, and Tableau, with a focus on delivering actionable insights through advanced visualization and financial logic simulations.

EDUCATION

Vellore Institute of Technology (VIT)

Vellore, India

Integrated M.Sc. in Computational Statistics and Data Analysis

2022 – 2027 (Exp.)

- Relevant Coursework: Statistical Inference, Regression Analysis, Time Series Forecasting, DBMS, Multivariate Analysis, Machine Learning, Data Structures & Algorithms.

TECHNICAL & DATA ANALYSIS SKILLS

Data Analysis: Exploratory Data Analysis (EDA), Statistical Hypothesis Testing, Data Cleaning (ETL), Data Wrangling, Time Series Analysis, Quantitative Analysis.

Programming & Tools: Python (Pandas, NumPy, Scikit-Learn, SciPy), SQL (MySQL, PostgreSQL), R Programming, Advanced Excel (Pivot Tables, Power Query, Macros).

Visualization: Tableau, Power BI, Matplotlib, Seaborn, Interactive Dashboarding.

Databases & Infrastructure: Git, GitHub, Relational Database Management (RDBMS), Linux, Agent-Based Modeling.

TECHNICAL PROJECTS

Smart Systematic Investment Plan (SIP) Engine

Python, SQL, Tableau

- Engineered a dynamic investment algorithm using **RSI** and **Moving Averages** to automate "buy-on-dip" logic, optimizing entry points for enhanced returns.
- Conducted **Exploratory Data Analysis (EDA)** on historical market data to identify volatility patterns; backtested the model against traditional SIP benchmarks.
- Visualized complex financial performance metrics and ROI trajectories through an interactive **Tableau** dashboard for stakeholder reporting.

Sheeps LLM: Swarm Intelligence Simulation

Python, AI Agents

- Developed an open-source AI framework utilizing **multi-agent swarm intelligence** to simulate complex real-world scenarios and forecast future trends.
- Applied **statistical modeling** to analyze emergent behaviors within virtual environments and optimize agent communication protocols.
- Led the end-to-end project lifecycle, from data modeling to predictive outcome forecasting.

LEADERSHIP & EXPERIENCE

Technical Project Lead

VIT Vellore

- Headed cross-functional teams for academic data science initiatives, managing task allocation and ensuring 100% on-time delivery.
- Mentored team members in **SQL query optimization** and Python-based automated data cleaning workflows.
- Translated complex statistical findings into visual reports and actionable insights for project reviews.
